REQUEST FORM (Include one sheet per strain)

All fields marked with asterisk (*) must be filled

***Kind of microorganism:**

- filamentous fungus yeast
 bacteria archaea

To be completed by the CECT

ID number:

Reception:

Completion:

***Identification/characterization method:**

A. For filamentous fungi and yeasts: Please tick (x) depending on the microorganism	
<input type="checkbox"/> Identification of filamentous fungi by phenotypical and molecular techniques	<input type="checkbox"/> Identification of yeasts by molecular techniques
B. For prokaryotes (bacteria and archaea): Tick (x) the requested method/s	
<input type="checkbox"/> Identification following partial sequencing (aprox 1000 bp) of the 16S rRNA gene	Miniaturized systems: <input type="checkbox"/> API 20 A, <input type="checkbox"/> API 20 E, <input type="checkbox"/> API 20 NE, <input type="checkbox"/> API CORYNE, <input type="checkbox"/> API LISTERIA, <input type="checkbox"/> rapid ID 32 STAPH, <input type="checkbox"/> rapid ID 32 STREP o <input type="checkbox"/> API ZYM
<input type="checkbox"/> Identification after almost complete (> 1400 bp) sequencing of the 16S rRNA gene	Miniaturized systems: <input type="checkbox"/> API 50 CHB, <input type="checkbox"/> API 50 CHE o <input type="checkbox"/> API 50 CHL
<input type="checkbox"/> Full phylogenetic study by complete 16S rRNA sequence analysis	<input type="checkbox"/> Cellular fatty acid analysis (FAME-MIDI)
<input type="checkbox"/> Ribotyping (Riboprinter®)	<input type="checkbox"/> Protein analysis by MALDI-TOF

***Strain designation:**

Material sent to CECT should be labelled accordingly

***Origin of the strain:**

Growth conditions:

*Optimum growth temperature: _____ °C *Incubation time: _____ *Atmosphere: _____

Special requirements:

*Culture medium (number in CECT list of media or composition):

Main features of the strain (cellular morphology, presumptive identification, etc):
