

ACCESSION FORM FOR PUBLIC DEPOSIT OF STRAINS

Type of microorganism

- ☒ bacteria ☐ archaea
☐ fungi ☐ yeast

To be completed by CECT

CECT accession number: 9728
 Date culture received: 18/09/2018

Strain description

*Scientific name (or proposed): Bacteroides uniformis

*Strain designation used by the depositor: WC_P2_B11-1.D7_G96

Type strain? ☐ YES ☒ NO

Is the microorganism genetically manipulated? ☐ YES (Fill in annex 1) ☒ NO

Please use 'HBC-557'
 for public database.

Information relating to the Convention on Biological Diversity (CBD – www.biodiv.org/)

Access in situ (sampling data):

*Source: Faeces from healthy human adult

*Country of origin (International waters included): UK

*Locality, state (latitude and longitude if possible): Cambridge, UK

*Date of sampling: 2017

*Sampled by (person and/or institution): Wellcome Sanger Institute

Documents relevant to the Nagoya Protocol (www.cbd.int/abs)

*Internationally Recognized Certificate of Compliance (IRCC): ☐ YES (attach document) ☐ Not applicable

*Sampling permit / Prior Informed Consent (PIC): ☐ YES (attach document) ☒ Not applicable

Reference:

Name and address of the person or organization who issued the PIC:

Details of mutually agreed terms (MAT, attach document):

Isolation of the strain

*Date of isolation: 2017

*Locality, state (latitude and longitude if possible): Cambridge, UK

*Isolated by (person and/or institution): Wellcome Sanger Institute

*If you did not isolate the strain, please indicate scientists or laboratories which maintained it before you:
 depositor < < <

Risk Assessment (Directive 2000/54/EC). CECT accepts strains belonging to risk group 1, 2 and 3^(*)

Risk group: ☐ group 1 ☒ group 2 ☐ group 3^()

*Pathogenic for: ☐ humans ☐ animals ☐ plants specify:

Growth and maintenance

*Temperature °C: 37 degrees Celsius

*Time of incubation: 24 hours

*Metabolism: ☐ Aerobic ☐ Facultative anaerobe
☐ Microaerophilic ☒ Strict anaerobe

*Special requirements (light, gas phases, etc.)

Does this microorganism survive freezing? ☒ YES ☐ NO

*Culture medium (CECT number or composition): YCFA

Additional data

Methods used for strain identification

Please attach reprint or supply strain specific data: 16S rRNA gene sequence

Reasons for deposit (biotechnological applications, quality control, etc.): part of publication under review

AGREEMENT FOR DEPOSIT IN THE OPEN COLLECTION:

1. Information regarding public deposits that are pending of taxonomic description will be kept confidential until description is published or until the depositor authorizes the publication in the open catalogue. If the information is not published after 4 years from the deposit, CECT reserves the right to release the strain to the public catalogue.
2. According to the CBD (Convention on Biological Diversity), is the depositor responsibility to ensure that the samples from which the strains were isolated, were collected according to the legislation of the country of origin and that the deposit of the strains in an open collection does not infringe any national regulation.
3. The undersigned declares that information provided in this form is true and accepts that CECT distributes subcultures of the deposited strain according to the terms specified in the CECT MTA.

*Depositor
